## Summary

Creative and self-starting Frontend Developer with 10+ years of experience and a background in both web design and development. Highly skilled in JavaScript, React, Vue.js. Working knowledge of TypeScript, Node.js. Passionate about developing processes to increase rapid, high-quality feedback from all stakeholders.

## Experience

### Senior Frontend Engineer

Grocery TV

May 2022 - Jun 2023 (1 year 2 months)

- Collaborated with product managers, designers, and backend engineers to prototype and launch a React Native application that is now used in thousands of retail stores nationwide.
- Designed and implemented a multi-app frontend architecture with a shared UI component library.
- Developed automation tools to streamline designers' workflows.
- Mentored junior engineers, providing guidance on best practices, code reviews, and career development.

### Senior Frontend Developer

Kronologic

Dec 2021 - Mar 2022 (4 months)

Collaborated with engineers, designers, and product managers to build an AI-powered meeting scheduler.

- Researched & documented various technologies and design patterns to help improve the codebase, documentation, and overall developer happiness.
- Spearheaded the E2E testing effort to help increase overall code coverage and introduce new testing methodologies.
- Introduced "Feature Toggling" support in the UI to encourage rapid, high-quality feedback.
- Created requests for proposals (RFPs) for standards and operational enhancements on frontend technologies.
- Collaborated on foundational elements of the first internal design system.
- Introduced "Silent Login" for a seamless login authentication experience.
- Participated in the development team feedback loop and mentoring of junior engineers.

### Senior Frontend Developer

Bottomline Technologies

Sep 2018 - Oct 2021 (3 years 2 months)

Working with UI designers on a daily basis to create React-based UI components and web applications with a focus on the financial industry.

- Bootstrapped and owned the UI development of the React-based financial analytics application.
- Contributed to the in-house, React-based UI component library.
- Implemented a zero-config visualization component library.
- Provided production support for several financial institutions.

## Design Technologist

Dell Technologies

Oct 2016 - Sep 2018 (2 years)

Worked with UX researchers and UI designers on a daily basis to create tools and rapid prototypes of experimental, forward thinking UI interactions using emerging web technologies.

- Worked on a team to build and patent a voice assistant: US 10937425
- Designed and built a SPA to assist UX designers in crafting custom Text-to-Speech voices.
- Kick-started the Vue.js Dell Clarity component library project.
- Designed & built tools for UX prototyping based on various cloud APIs.
- Earned the 'Spot Award' for the development of the official DellEdgDesign.com website.

## Frontend Developer

Clevertech

Feb 2013 - Jan 2016 (3 years)

UX/UI Developer utilizing responsive web design technologies such as Foundation, Bootstrap, CSS3, Ajax, and JavaScript based libraries.

- Worked closely with a distributed team of designers, developers, and project managers to ensure the production of high quality applications.
- Built the component library, based on the Atomic Design principles, for domino.com
- Developed a Single Page Application for recoveringme.com

## Education

### Westwood College - Denver North

Web Page, Digital/Multimedia and Information Resources Design  
2007 - 2008

### Texas State Technical College

Web Page, Digital/Multimedia and Information Resources Design  
2005 - 2006

## Honors & Awards

### Spot Award - Dell

Feb 2017

Awarded for the work on the Dell Design website
